17X11 Digital Print ©2007 Steven J. Brooks

Motivation: The daughter of the woman on my business card tried to recreate that with herself with her cameraphone in front of the office one day.

I photographed the sky and tree, I drew Morticia by hand,

colored her in Photoshop. I Modeled the light poles, Conkaline's Facade and ColorInAble.com sign.

There is no compositing in this image at all, it's rendered directly out of Lightwave (No, I didn't even use the compositing features of Lightwave!!!).
